In addition to the ordinary direct draft under the grate and through the fire-shamber, the gas-burner has an additional draft through the top plates, which is of itself sufposes, Cashmeres, Coburg Cloths, Alapaeas, Debaies, Ginghams, square and long Shawis,

acient to maintain combustion. The upper draft not only consumes the gases, but it helps to strengthen and preserve the centre pieces, which are most exposed to the direct action of the fire, and which are made double instead of the usual single plates. By means of this draft alone, all the operations of cooking can be carried on when the fuel is but partially ignited, and the fuel consequently burns more slowly and more economically. A sufficient evidence of the effect of the

gases in heating the oven, is found in the fact that the oven will be ready for baking, even before the fire is thoroughly kindled, and much sooner than in any other stove.

As Gae-burning Stoves are the order of the day, the Gas-burning Cooking Stove will not only be the leading stove of the present else in the men's wear line. Scrofula, or King's Evil is a constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, use is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living, disordered or unbealthy food, impure air, filth and filthy habits, the depressing vices, and, above, all, by the venerual infection. Whatevar's its origin, it is hereditary in the constitution, descending "from payents to children unto the third and faurth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon will visit the iniquities of the fathers upon

Its effects commence by deposition from the od of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubersles; in the glands, swellings; and on the surface, eruptions er sores. This foul corruption, which genders in the blood, depresses the energies of life, so that aerofulous constitutions and only suffer from accordings are plaints, but they have far less power to with-stand the attacks of other diseases; cousequantly, vast numbers perish by disorders which, although not scrofulous in their nature, are still readered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or

are aggravated by the same cause.

One quarter of all our people are acrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in

AYER'S Compound Extract of Sarsaparilla. the most effectual remedy which the medical skill of our times can devise for this every where prevailing and fatal malady. It is com-bined from the most active remedials that have been discovered for the expurgation of this foul disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only scrofula, but also those other affections which arise from it, such as ERUFIVE and SKIN DISPASES, St. ANTHONY'S FIRE, ROSE, OF ERTSIPHIAS, PINPIES, PUSTULES, BLOTCHES, BLAINS and BOLLS, TUHORA, TETTER and SALVE PROVINCE SCRUENCE AND PROVINCE SCRUENCE. and SALT REEUM, SCALD HEAD, RINGWORM. The Liver Invigorator,

DREPARED by Dr. SANFORD, compounded entirely from GUMS, is one of the best Purgative and Liver Medicines now before the public, that acts as a Cathartic, ensier, milder, and more effectual than any other medicine known. It is not only a Cuthartic, but a Liver remedy, acting first on the Liver to eject its morbid matter, then on the stomach and bowels to carry off that matter, thus accomplishing two purposes effectually, without any of the paleful feelings experienced in the operations of most Cathartics. Great Improvement

COOKING STOVES .- Consumption of Smoke and Gas, and Saving of Factor The subscriber would respectfully inform the public that to has added to his former variety of Stoves, a new Patented Gas-burning COOKING STOVE.

The heat of the fire, in ordinary cooking oxygen is exhausted before it has passed 8th day of November next, at 10 o'clock, A. through the fire-chamber. The close flues at M. WM. McClEAN, Auditor. the top of the stove, then act as an extinguisher, tending to put out the fire, instead of assisting the combustion. A large portion of the fuel, therefore, passes off in the shape of smoke, clogging up the flues of the stove so as to impede the draft and interfere with the baking, wor of invisible gas which combines with the lime and so destroys the mortar of the chimneys, loosening the bricks, and

exposing the dwellings to the danger of fire.

The introduction of an additional supply of cold air, would cool the gas kelow the against the same to present them properly authenticated for settlement.

JOSEPH SHERFY, Adm'r.

Out. 18, 1858. Gt exposing the dwellings to the danger of fire. degrees (which is one of the prominent fer-tures of the patent), the gases are inflamed in numerous jets, and their combustion is sufficient to heat the oven, even if the diaft through the fire-chamber is entirely closed.

In addition to the ordinary direct draft

under the grate and through the fire-chamber, the gas-burner has an additional draft through the top plates, which is of itself suf-ficient to maintain combistion. The upper draft not only consumes the gases, but it helps to strengthen and preserve the centre pieces, which are most exposed to the direct action of the fire, and which are made double instead of the usual single plates. By means of this draft alone, all the operations of cooking can be carried on when the fuel is but partially ignited, and the fuel consequently burns more slowly and more economically.

A sufficient evidence of the effect of the gases in heating the oven, is found in the fact that the oven will be ready for baking, even before the fire is thoroughly kindled, and much sooner than in any other stove. As Gas-burning Stoves are the order of the

day, the Gas-burning Cooking Stove will not only be the leading stove of the present season, but it will undoubtedly supercede all others. Purchasers will, therefore, consult their own interest, by seeing and examining it before giving any orders elsewhere. The aperation is so perfect, and its advantages lent full cloth suit, made up, for \$13, for ingre so easily table seen and understood, that stance. A Song of Life.

A traveller through a dusty road Strewed acorns on the lea; And one took root and sprouted up And grew into a tree. Love sought its shade at evening time, To breathe its early yows,

And age was pleased in heat of noon, To bask beneath its boughs, The dormouse loved its dangling twigs, The birds sweet music bore: It stood a glory at its place-

A little spring had lost its way Amid the grass and tern; A passing stranger scooped a well Where weary man might form; He wall dit in, and hung with care A ladle at the brink,— He thought not of the deed he did, But thought that all might drink; He passed again—and lof the well, By summers never dited, Had cooled ten thousand parched tongues,

The Vineger Plant.

It is claimed by many that this curious production belongs to the yegetable kingdom. Whether this is true or not, we hardly know where to place it. Like the mushroom, it belongs to the lowest order of organization, and may, we think, be regarded as a kind of fungus. It possesses the power of re-production to a limited extent, governed in some degree by the temperature, but always requiring a degree of heat above 65.

The vinegar plant is somewhat and flexible, with a firm springy consis-

and floxible, with a firm springy consis-tency resembling the substance known to accumulate in a vessel containing good vinegar, as "mother," but of a more compact and regularly defined formation. When separated from its parent, this plant is about six inches in diamotor and half an inch thick. This diameter and half an inch thick. Horrible Tragedy in New York. Altempted Butchery of a Family by a Son-Suicide of the Murderer .- One of the most terrible tragedies ever recordcd was enacted in West Thirtieth Street, Now York, op Tuesday night last. Fran-cia A. Gouldy, aged 19 years, a "fast" young man, son of Francis Gouldy, Led., a retired merchant, was the author of the deed. It seems he went home to his father's house, where he stayed, before 10 o'clock, when his father reproved him for taking a fifty dollar theck. The young man admitted it, but justified himself by saying that the check was drawn in his name. He then went to his room, and shortly returned, with a hatchet, with which he struck his father a heavy blow on the fiend, fracturing the skull and striking therefrom a piece of bone two and a half inches long. Scrofula, or King's Evil, is a constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it porvades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living, dis-ordered or unhealthy food, impure sir, filth and filthy habits, the depressing vices, and, above all, by the venerual infection. What-ever be its origin, it is hereditary in the con-stitution, descending "from parents to children unto the third and faurth generation;" indeed, it access to be the rod of Him who says, "I will visit the iniquities of the fathers upon will visit the iniquities of the fathers upon

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, eruptions or sores. This foul corruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous constituplaints, but they have far less power to withstand the attacks of other diseases; conse quently, vast numbers perish by disorders which, although not scrofulous in their nature, are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this serofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or

and, nutery, or an the organs, area from or are aggravated by the same cause. One quarter of all our people are acrofulous; their persons are invaded by this lurking in-faction, and their health is undermined by it. To cleanse it from the system we must ronovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in

AYER'S Compound Extract of Sarsaparilla. the most effectual remedy which the medical skill of our times can devise for this every where prevailing and fatal malady. It is com-bined from the most active remedials that have been discovered for the expurgation of this foul disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only scrofula, but also those other affec-tions which arise from it, such as Enurriva and Sein Diseases, St. Anthony's Fire, Ross, or Enverrence, Perrins, Postulas, BLOTCHES, BLAIMS and BOILS, TUMORS, THTTER and Salt Rusem. Scald Head, Ringworm. RHRUMATISM, STPHILITIO and MERCURIAL DISmasse. DROPSY. DYSPRESIA, DEBILITY, and, indeed, all Complaints arising from TED OR IMPURE BLOOD. The popular belief in "impurity of the blood" is founded in truth, for scrofula is a degeneration of the blood. The particular purpose and virtue of this Sarasparilla is to purify and regenerate this vital fluid, without which sound health is impossible in

contaminated constitutions.

FOR ALL THE PURPOSES OF A FAMILY PRYSIO, are so composed that disease within the range of their action can rarely withstand or evade them Their penetrating properties search, and cleanes, and invigorate every portion of the human organism, correcting its diseased action, and restoring its first handly vitalities. As a consequence of these properties, the invalid who is bowed down with pain or physical debility is astonighed to find his health or energy restored by a remedy at once so simple and inviting.

Not only do they sure the every-day complaints of every body, but also many formidable and angerous diseases. The agent below mamed is pleased to furnish gratis my American Almanae, containing certificates of their cures and directions for their use in the following complaints: Coefficiences, Heartburn, Headashe arising from disordered Stomach, Nausea, Indignation, Pain in and Morbid Inaction of the Bosels, Fluintersy, Low of Appesite, Joundice, and other kindred complaints, arising from a low state of the body or obstruction of its functions.

So wide is the field of its warfalness and so namerous are the cases of its enter, that almost every section of country abounds in pursons publicly known, who have been pattned from alarming and even desperate discuses of the lungs by its use. When once tried, its superiority over every other medicine of its kind is too apparent to escape observation, and where the virtues are known, the public no longer healtain what astidote to supploy for the distressing and dangerous affections of the pulmonary organs that are incident to our climate. While many inferior remedies thrust upon the community-have fallist and been distracted, this has gained fiftend by every tipal, conferred benefits on the afflicted they can never forget, and produced curse too numerous and too remarkable to be forgesten.
